EXPERIENCE //

MDS Property Management Software | Hauppauge, NY

UI/UX Designer   *Jul 2022 - Present*

As the sole UI/UX Designer responsible for our flagship product:

- Kickstarted & actively managing the development of an in-house design system using atomic design that aligns with company mission & values.
- Work alongside developers in an agile environment to completely overhaul the feature handoff experience, resulting in reduced time to ship and improved product cohesion.
- Lead the design effort from concept to production for several keystone features with thousands of daily users, including UX research, UI design, incorporating stakeholder feedback and developer collaboration.

Data Conversion Specialist   *Dec 2019 - Jun 2022*

- Lead engineer on migration project responsible to North America's leading property management firm worth $6B USD
- Implemented project management tools such as Trello to define key milestones and keep multi-month initiatives with strict deadlines on track.
- Collaborated with internal cross-disciplinary teams and external stakeholders to translate business logic into database architecture.
- Authored hundreds of pages of evergreen technical documentation for future reference

Report Design Specialist   *Jun 2016 - Nov 2019*

- Quoted, designed and coded financial reports issued monthly to shareholders for over 50 clients worth in excess of $100M USD.

Software Support Specialist   *Dec 2014 - May 2016*

- Became a product expert to diagnose and solve client issues, reproduce and report bugs, and funnel product inquiries to the sales team.
